

# Caregiver Burden

## RESEARCH STUDY

### PURPOSE

To explore how individual members of the family are affected by caregiver burden when providing care for a child with special needs.

The outcome of this study would provide targeted counseling approaches and respite for family members of children with special needs based on identified areas of burden.

### ELIGIBILITY

**Adults  $\geq$  18yrs old** who have a **family member** (child  $<$ 18yrs) **with special needs**.  
Individuals who are able to independently consent to participation.
