

Dr. James A. Ferguson Emerging Infectious Diseases RISE Fellowship

Who We Are

The Dr. James A. Ferguson Emerging Infectious Diseases RISE (Research Initiatives for Student Enhancement) Fellowship supports public health research and professional development in the areas of infectious diseases and health disparities, with a special focus on increasing knowledge and interest in public health research careers among students from underrepresented populations. The fellowship program is funded by the Centers for Disease Control and Prevention (CDC). Ferguson RISE fellows may participate in public health research experiences lasting 12 months (full-time), 10.5 weeks (summer) or six months (part-time or full-time, beginning in February). Fellows may also gain clinical experience and develop professional leadership skills in the public health field.

The Fellowship

All fellows participate in an orientation at Kennedy Krieger Institute focusing on understanding health disparities and career opportunities in public health. Following orientation, fellows learn about research design and analysis and participate in research projects in infectious diseases, health disparities, men's health, mental health, adverse childhood experiences, LGBTQ+ health, developmental disabilities, cancer, cardiovascular health, or prevention of and treatment for drug dependence. Ferguson RISE Fellowship sites include Kennedy Krieger, The Johns Hopkins University School of Medicine, The Johns Hopkins University School of Nursing, Johns Hopkins Bloomberg School of Public Health, The City University of New York, Howard University, Morehouse School of Medicine, the Rollins School of Public Health at Emory University, the Maryland Department of Health and CDC sites in Atlanta and elsewhere.

The sites at Kennedy Krieger, Johns Hopkins, Howard University College of Medicine, Rollins School of Public Health, The City University of New York and Morehouse School of Medicine integrate clinical opportunities and research experiences in hospital, national, state and community settings.

Our Fellows

To qualify for a Ferguson RISE Fellowship, applicants should meet the following eligibility requirements:

- **Summer (10.5-week) fellowship:** Must be enrolled as a full-time student in a medical, dental, pharmacy or veterinary program, or in a graduate program in public health, allied health or one of the social sciences.
- **Six-month fellowship:** Must be enrolled as a full-time student of, or be a recent graduate of, a medical, dental, pharmacy or veterinary program, or be enrolled in a graduate program in public health, allied health or one of the social sciences.
- **Twelve-month fellowship:** Must be able to work full time (40 hours per week) and be a graduate-level scholar (i.e., must be either a recent postgraduate [i.e., post-master's or postdoctoral scholar] or be enrolled in a graduate program that allows full-time employment).
- **All fellows:** Must have a 3.0 GPA or higher on a 4.0 scale, and must be able to commit to the full length of the fellowship.

Students should have a strong interest in research addressing health disparities. Students who are members of under-resourced and underrepresented populations as defined by the federal government (diversity.nih.gov/about-us/population-underrepresented) are strongly encouraged to apply.

Program Benefits

If selected for the Ferguson RISE Fellowship program, fellows receive a stipend and research and professional mentorship, and (as funding allows) are sponsored to attend a scientific meeting. Out-of-state students will receive round-trip travel and housing.

The Ferguson RISE Fellowship is designed to offer students outstanding educational and professional opportunities.

Participants are expected to:

- Attend weekly public health learning seminars during the summer (summer and 12-month Ferguson RISE fellows).
- Deliver a formal research or public health presentation to peers and mentors at the end of the summer session.
- Submit a research abstract to a national scientific meeting. Students will be sponsored to attend the meeting as funding allows.
- Publish research in peer-reviewed journals.

Fellowship Length	Stipend Amount
12-Month Postdoc	\$56,484
12-Month Post-Master's	\$42,550
Summer Pre-Master's	\$7,693
Summer Predoc/Post-Master's	\$8,592
6-Month Pre-Master's (19 hours/week for 4 months + full-time for 2 months)	\$13,188
6-Month Predoc (19 hours/week for 4 months + full-time for 2 months)	\$15,120

What Do Former Fellows Say?

"One of the most beneficial (and coolest) aspects of the program was seeing how the CDC operates. ... Networking is a major part of what I've been able to do at the CDC. I have a better idea of what I would (and would not) want to do in my future career in public health."

"My mentor was amazing. She gave me numerous opportunities to develop my research as well as clinical skills. These opportunities included selecting a research project based on my interests, shadowing during grand rounds, participating in outreach events such as Baltimore Pride, and attending infectious diseases conferences."

Contact and Application Information

Please visit KennedyKrieger.org/Ferguson or email Ferguson_Fellowship@KennedyKrieger.org for more information or to apply.

Applications for the Ferguson RISE Six-Month Fellowship must be submitted by November 28.

Applications for the Ferguson RISE Summer Fellowship and Ferguson RISE 12-Month Fellowship must be submitted by January 31.

For general Kennedy Krieger Institute information, visit KennedyKrieger.org or call **888-554-2080**.

Kennedy Krieger Institute recognizes and respects the rights of employees, trainees, and patients and students, and their families. At Kennedy Krieger, we ground our care, services, training and research in treating others with respect and civility. We respect the cultural identity of every person. Kennedy Krieger does not discriminate against people based on, but not limited to, perceived or actual race, color, culture, ethnicity, national origin, age, language spoken, accent, marital status, veteran or military status, immigration status, socioeconomic status (i.e., access to resources), physical or mental disability, religion, pregnancy status, sex, sexual orientation, or gender identity or expression. We strive for equitable care for all individuals for whom we provide services, training, education and research participation. We encourage employees, trainees, and patients and students, and their families, to become active partners in the services provided by asking questions, seeking resources and advocating for their needs. Our culture of care is extended to our patients, the patients' family members and other persons served. Here, "family" refers to parents, other family members, guardians, surrogate decision-makers and healthcare agents. © 2023 Kennedy Krieger Institute 10/2023
