

# Does your child have Epilepsy?

**Children  
between 6-17  
years old with  
Epilepsy and  
Anxiety**

**Participate in a  
research study:  
11 study visits  
over 16 weeks**

This is a clinical research study of a medication that may treat both anxiety and epilepsy

- For children and adolescents 6 -17 years with seizures who often are nervous or afraid.
- Participants will not be charged for being in the study.
