

# **Outpatient Visitation Policy**

**EFFECTIVE 04/17/2023**

- Patients and visitors with any respiratory symptoms, including congestion/runny nose, must mask while in any Kennedy Krieger building or reschedule their appointment.
- All patients and visitors must be free from vomiting, diarrhea, and fever (without the use of fever reducing medications) for at least 24 hours to attend their appointment. If it has not been at least 24 hours, the appointment must be rescheduled.
- It will be at the discretion of the clinician to determine if a patient is able to continue with their appointment if patients arrive with symptoms (unless vomiting, diarrhea, and fever have been present in the last 24 hours).
- If possible, siblings should remain home and not attend appointments with the patient during peak Respiratory Virus Season (RVS).
- Children with signs and symptoms of illness will not be allowed in the playrooms.

**If you have questions, please call the office of Patient and Community Engagement at 443-923-2640.**
