The MCPD Autism/IDD/Alzheimer's Outreach Program, as part of its layered approach to awareness and safety provides Autism/IDD/Alzheimer's education to all of our MCPD officers, caregivers, the community and individuals. The goal is to provide a safe, understanding and well informed community for those with Autism/IDD/Alzheimer’s to live and flourish.

The Montgomery County Department of Police have utilized the Project Lifesaver RF bracelet tracking program since 2004. The Autism/IDD/Alzheimer’s Outreach Program quickly learned that tracking has to be the last step in the prevention of wandering/elopement. Tracking is a good tool but only when coupled with the other safety measures. The goal is to hopefully prevent wandering/elopements in the first place. The bracelet is only placed once all possible safety measures, which are compiled in this brochure, are utilized.

Please visit www.montgomerycountymd.gov/Lifesaver or contact the program coordinators for more information.
Autism/IDD/Alzheimer’s Wandering Prevention Safety Tips

- **Install An Alarm of Some Type.** Many times, caregivers are not aware that the loved one has left the home, especially during the evening hours when “sundowning” (waking at all hours of the night) is common. An alarm is also important during the day when caregivers may be distracted. If you cannot afford a professionally installed alarm, magnetic door alarms are a good option as well. They are inexpensive and readily available. The alarm is attached with strong tape or a screw to either side of a door frame. When the connections are separated (door opening) it gives off a high decibel alarm. They can be set to chime during hours when a door may be opened more frequently.

- **Do Not Hesitate to CALL 911 - Do Not Wait.** In some instances, families will search for their missing loved ones alone and feel as if they can’t call 911 for assistance. If you are searching beyond your yard, call 911. If the loved one is located soon after you call, just call back and let us know. Montgomery County Police handle 2-3 calls a week for critically at-risk individuals with Autism/IDD/Alzheimer’s. You are not alone in the sometimes struggle to keep your loved one safe in your home. Waiting to call 911 could lead to tragic results. Have a “script” prepared with pertinent information to relay to 911 call takers and responding officers. If your Autistic loved one will go into bodies of water, please notify the 911 operator.

- **Identification.** Make sure that the loved one has some type of identification on them at all times. Writing contact information in permanent ink on as much clothing as possible is a good, cheap idea. However, an ID bracelet is the best option, the rubber or silicone types are the best option. MCPD encourages families of individuals with Autism to have the wearer show the bracelet to officers in the community when feasible. This act creates an encounter with law enforcement when the wearer is not under stress. It can reinforce the idea that the wearer is here to assist when needed. It also makes the officer aware of those with Autism that live in the area they work. The familiarization is so important for both the wearer and the officer.

- **Informing.** We encourage informing neighbors of the situation, if you feel comfortable doing so. We understand that some caregivers might not feel comfortable letting neighbors know there is an issue. However, a tragedy may be prevented by making them aware of the potential dangers of your loved one wandering alone. You can provide the neighbors with a contact person’s cell phone or request they call 911 in the event they think the loved one is in need of assistance.

- **Consider Swim Lessons.** For caregivers of children with Autism, teaching your child to swim early could absolutely save their life!
Please Help Us Keep An Eye Out For Our Child Who Has Autism/IDD.

We have a child who has Autism/IDD. Our child's name is __________________________.

He/she is __________ years old.

We watch our child very carefully, but sometimes he/she unpredictably wanders away.

If you see our child and he/she is alone please call __________________________.

We are probably already looking for him/her.

If you can not reach me at the number above, please also call 911 and tell them that you have found our child.

________________________ does not speak very well. Our child does not appreciate danger. He/she might approach a dog or walk into the street without looking. He/she might walk in your house if a door is open.

________________________ will become lost very easily and not know he/she is lost.

If you ask our child a question he will likely not answer.

________________________ may seem to be deaf. However, our child can hear.

But he/she does not appreciate or act upon things that he/she hears or sees.

Thank You,

Name: __________________________________________________________________________

Address: __________________________________________________________________________

Phone(s): __________________________________________________________________________

Autism/Intellectual and Developmental Disabilities/Alzheimer’s Elopement 911 “Script”.

The below 911 Script is to be filled out ahead of time by caregivers of the individual. In the event of an elopement, caregivers can easily relay the important information to the 911 call taker and responding officers.

Name: ________________________________________ Birthdate:

Height: __________ Weight: ______________

Hair: __________ Allergies: ______________

Eyes: __________ Diagnosis: ______________

Past places of employment / worship: ______________

Past places of residences / schools: ______________

CALL 911 IMMEDIATELY IN THE EVENT OF AN ELOPEMENT!
DON'T WAIT TO CALL 911, we are your best tool in locating your loved one quickly.

My loved one may do the following should they elope (bolt and run, not respond to name, go to bodies of water, etc.) ______________

My loved one may go to the following destination should they elope (local parks, local businesses, bodies of water, pools, ponds, etc.) ______________

If you encounter my child the following would be helpful for officers to know (they may bolt and run, they may not respond to their name, they may hide, etc.) ______________

It is beneficial to responding officers that you are familiar with potential points of interest for your loved one as well as the locations of bodies of water, especially for individuals with Autism. Please print out and include with your 911 Script a Google map of the area around your home and pin point any potential dangers or possible destinations your loved one may be drawn towards in the event of an elopement/wandering episode. Example: Nearby Bodies of Water; A = Our House (12345 Street).
Please Watch Out For

Who Has Alzheimer’s.

This letter lets your neighbors know that if they see him/her at an unusual time out alone, they should call your cell phone or call 911.

Name: ____________________________________________
Birthdate: __________________________________________
Height: ________ Weight: ___________________________
Hair: ______________ Eyes: __________________________
What they normally wear: ____________________________

He/she should normally not be out and about alone, if you should see him/her, please don’t hesitate to approach him. Please contact my cell phone number if you should see him alone.

We do our best to watch him/her at all times, but occasionally he/she will get out without us and become confused.

Provide any other information you feel comfortable sharing.
