

ATTENTION PARENTS OF CHILDREN AGES 8-12

We are recruiting children for an MRI study to investigate the differences between the brain structure and its function in children with and without Tourette Syndrome (TS).

Who: Children with TS & typically developing children

What: 1 virtual visit & 2 in-person visits consisting of an interview, questionnaires, computer games, paper & pencil tasks, Transcranial Magnetic Stimulation (TMS) & a Magnetic Resonance Imaging (MRI) scan of the brain.

You will receive free IQ testing with a report of results & a picture of your child's brain!

Where: Kennedy Krieger Institute in Baltimore, MD

Benefit: There are no significant risks or direct medical benefits for participating in this study

Compensation: \$50.00 per day of study participation

Contact: Jenny Fotang, email: Fotang@kennedykrieger.org
