

Children Are Our
Commitment.

EXPLORE OUR FRAGILE X SYNDROME CLINICAL RESEARCH TRIAL TODAY.

The behavioral issues associated with a Fragile X diagnosis can create daily challenges for your child. Learn more about a clinical trial evaluating investigational topical cannabidiol (CBD) gel to see if it helps improve Fragile X related behavioral issues.

Qualified Children Are:

- Between 3 and 17 years of age
- Diagnosed via genetic testing, with Fragile X syndrome
- In generally good health

Additional criteria apply

Qualified Children May:

- See a study doctor at no cost to you
- Receive access to an investigational topical gel
