Do you have a child between 8 and 12 years of age?

Researchers at the Kennedy Krieger Institute and the Johns Hopkins Hospital are looking for volunteers to participate in a research study.

To participate in the study, your child must:
- Be 8 to 12 years of age

This study involves 3 study visits involving:
- Neurological examination
- Neuropsychological testing
- MRI of the brain
- Blood sample completed at one of the visits above

After the 3 visits above, this study may require annual visits until age 12 years including neurological exam and blood sample collection. At their final visit at age 12, this study will require neurological examination, neuropsychological testing, MRI of the brain, and blood sample collection.

Compensation provided
