

# Notice to Kids and Young Adults Ages 8-15

& their Parents

## Become a Volunteer in a Research Study!

Sign-up for one day of testing using simple school-like tests and saliva collection. Participants will receive a \$35 gift card.

Help scientists at Kennedy Krieger Institute and across the country develop a simple, accurate, and inexpensive screening test for dyslexia by examining the connection between genes and reading. This may help researchers identify children at risk for developing dyslexia early on, perhaps even before they have problems with reading. Participation will involve one study visit of about 3 hours. There are no significant risks, and no direct medical benefits for participating.

We are looking for

- ✓ African American or Hispanic
- ✓ Ages 8-15 years old
- ✓ Fluency in English

Please call Taylor Koriakin at 443-923-7927  
or e-mail [koriakin@kennedykrieger.org](mailto:koriakin@kennedykrieger.org)
