Getting a COVID-19 Vaccine

COVID-19 is a virus that has made many people very sick. Some people have died.

Now there is a vaccine. The vaccine is in a jab.

The vaccine jab puts medicine in my body to keep me from getting COVID-19.

When it’s my turn, I can get the COVID-19 jab to stay healthy.

I will go to a doctor’s office or the chemist to get my jab.

I will check in when I arrive, sit, and wait for the nurse to call my name.

I will roll up my sleeve. The nurse will rub a cold wipe on my arm. It might smell funny.

Then the nurse will give me the vaccine jab. It will feel like a pinch or a prick. I will sit very still.

The nurse will put a plaster on my arm.

Getting the COVID-19 Vaccine
Pt. 2

I may need to wait to make sure I am safe and healthy to go home.

After the nurse tells me it’s OK, I am done for today. Now I can go home.

I need 2 COVID-19 vaccine jabs to stay healthy.

I will come back in 3-4 weeks to get the second jab.

When I come back, I will go through the same steps to get my second jab.

After the jabs, my arm may be sore. I may have a headache or feel tired.

I will feel fine after a couple of days.

I will still need to wear a mask for awhile.

I did my part to stay safe and keep others healthy!
