Unity Clinic

A program serving the Deaf and Hard of Hearing Community and empowering families who have experienced trauma

Every child is born with great potential. Shouldn’t every child have the chance to achieve it?
Our Program
It can be difficult to find mental health services for deaf or hard of hearing children who have experienced trauma. The Unity Clinic was started to meet this need. We:
• Help deaf and hard of hearing families who have had bad experiences or trauma
• Offer mental health services in American Sign Language
• Have certified staff interpreters who work with the therapists

Who We Serve
• Deaf and hard of hearing families and individuals up to 18 years of age who have experienced trauma.

Concerns We Address
The Unity Clinic can help with a variety of reactions to trauma,
• Acting out
• Falling behind
• Withdrawal
• Stress

Our Clinical Team
• Sign fluent therapists
• Therapists who are trained in deaf culture
• Dually certified staff interpreter
