Who We Are
Our program combines the medical expertise of gastroenterology with the therapeutic techniques of behavioral psychology, speech and language pathology, occupational therapy, nutrition, and social work. We emphasize an integrated, interdisciplinary, and collaborative approach through patient care, research, and administrative services to accomplish our mission. Our methods have become a national standard in the treatment of feeding disorders.

Who We Serve
We treat children and adolescents with a variety of disorders, including:
- Gastroesophageal reflux disease
- Failure to thrive
- Prematurity
- Esophagitis
- Gastritis
- Duodenitis
Our patients range in age from 1 to 12 years, with an average age of 4 years.

Our Team
Working as an interdisciplinary team, patient care is provided by:
- Pediatric gastroenterologists
- Nurse practitioners
- Behavioral psychologists
- Clinical specialists
- Behavior data specialists
- Developmental playroom specialists
- Speech-language pathologists
- Occupational therapists
- Pediatric nutritionists
- Social workers

Our Success
Our program has a proven record of treatment success and patient satisfaction:
- 81% of patients met or exceeded their treatment goals set at the time of admission
- 91% of patients indicate overall satisfaction
